

Leading the Industry

in the manufacturing of precision components

J&J Precision Eyelet, Inc. is an ISO 9001:2015 certified manufacturing company specializing in the automotive, electrical, ordnance, hardware and medical industries. We are the Northeast's premier manufacturer of custom deep drawn and stamped precision components and parts. We provide quality, defect-free products, on time and at competitive prices.

With over 55 years of experience in traditional toolmaking and advanced manufacturing systems, our company offers customers a wide variety of services to meet your Eyelet and Stamping needs. Our on-site engineering capabilities and state-of-the-art equipment can take your project from product design to prototype, to large production runs.

Contact us and step into a winning partnership with J&J Precision Eyelet, Inc. Our highly skilled staff is ready to assist you in developing your new or existing product lines.
